### Abstract:

In this article, there are ideas about creating special manuals for the acquisition of musical knowledge by blind young people, and it was proved that they have a high level of musical performance, just like healthy children.

**Keywords:** heart's eye, braille, tiflopedagog, solfeggio, interval, chord, alteratsiya, dynamik pribor.

One of the best of the blessings is that it is more olsh than the world, and it is an inroads. The blessing of your Creator is that we are guests of this bright world and that we can enjoy all the blessings that godly devotion has bestowed upon us. There are such inhumans, this turf is the beauty of the world of sergeants: the sky, the eyes of the unscrupulous life that is being subjected to the barren time, the balk, the hearts of the blue-and-white oral cavity.

After all, the eye of the heart is a master's degree in all that God has created. Suddenly, the mother hen gives a tremulous, watchman on a tower saw "the heaving joyful joy of God." This adaptation process has created a need for convenient conditions in the life of the nobles to live, acquire knowledge, choose a career, and have their place in the community. The crocodile's jaw was covered with a jawbone of jawbone. In the years that followed, innovations and communities were scattered.

Today, for the purpose of overcoming the lives of blind innocents, many opportunities are being created for them from our country, and public donkeys are being opened in every area. To assist individuals desiring to benefit the worldwide work of Jehovah's Witnesses through some form of charitable planning, a brochure has been prepared in English and Spanish entities. For example, young people who are blindfolded in the field of music and art are making many strides. They present their craftsmanship in large-scale scenes and take pride in not only in the Republic but also in international competitions.

Eye-poured artists: Rustamqor Tursunov, Olmas Rasulov, Orolmrzo Safarov, Ochlbek Matchonov are joining our musical art industry. As President of the Republic of Uzbekistan Shavkat Mirziyoyev pointed out, "We have a great scale that is desirable if we are passionate. We have great ancestors who are desirable. We have unscrupulous necklaces that are desirable. And I am a member of the Governing Body of Jehovah's Witnesses, a member of the Governing Body of Jehovah's Witnesses, a member of the Governing Body of Jehovah's Witnesses."

One of the most beloved areas of the eye-feeding insons was mussels, and they could not live without a monkey. The resulting embryo was allowed to develop in nutrients and then inserted into her womb, where it implanted. The blindfolded inns were well-educated in this regard. This is why the Samaria of Samaria, on the other hand, created a time for them to take over the industry. Today, special syndicates

of children's music and art schools have been discarded throughout the "Nurl Sanctuary" schools, in these snfs, blind and blind children are being recognized in a number of ways by healthy children.

President of the Republic of Uzbekistan Shavkat Mirziyoyev at a meeting of the Uzbek company's craftsmans said: "Adabiot and art, and attract young people to the art of music, the operation of the cylinder's cylinder from the cylinder surface is being served in the cylinder's cylinder. After all, our countryman cares about all kinds of support for the highly skilled youth.

The issue of solving problems that young people have not solved in the musculatic sphere remains relevant. The innovative process that is entering the field of education today, At a time when they are competing with one another, the taste of the ojzlar, in the face of musical orientation, lags behind the demands of the times in the efficient distortion of their activity. Chunk, the musical education of eye-trained students, The lack of the necessary manuals and textbooks in Brayl's note recording remains a pressing problem for musical performance, notary literacy, solfedzio, and musical perspectives. In the latter case, the presence of the IUD could close to the historic centre of the city, close to the historic centre of the city. The orchestra and the Chorus, as well as the drularity, may not have been mentioned in it. In many cases, blindfolded students are forced to rely on a unique memorable childish desire and, in many cases, to be self-absorbed. That is, they are learning to sing an additional song that does not play a drum with more tongue-shaped orgasms. The rest of the routes seem to them to be a dream.

To solve this problem, the science in the field is a bourgeois with deeper tracking. To do this, we need to fundamentally study the foreign adaptations in the bracket note entry that have existed and entered the list of unspecifying education in accordance with the national standard of education. First of all, in schools where "Nurl naskan" is in a state of shock, Secondary schools need to create special methodologies and textbooks (Musqa Alphabet and Perspective) for eye-catching students who are enrolled in special classes for open-eyed children, children's music and art schools, the literacy of teachers who are actively studying in a variety of musical instruments, as well as educated students, to look at the music, to solve od problems for solfedjority. Similarly, the mask is in the manual: sound and flour types, musical sound characteristics, squirmal thickness, note writing and stretches, rhythm, measurements, alteratsya and religious documents, intervals, note stretch extensions, and note recordings should be understood in the tlflaping language of all necessary knowledge. The list of five chrysanthalms in Musqa literacy and the four points that all documents followed through Prborning were intended to collect their own. I'm going to revisit the documentation of the nuisance birthplace, adaptation, and creativity of what is not available, has paved the way for many of the theoretical innovations that have been discovered after itself. In the future, the infectious prey of young children will be absorbed into the pigs, and the mature manifestations of musical science, as well as great artists, will be disgruntled.

## CONCLUSION

In the summary, the following actions and methodological intestinal features are used to solve these problems, and the following are the objectives of the bourgeoisie:

1. Create a Brail note alphabet.

2. To assist the worldwide work of Jehovah's Witnesses through some form of charitable giving, a brochure entitled Charitable Planning to Benefit Worldwide has been prepared.

3. Customize Brail's files for eyeballs such as jory cylinders, Tflometeronoms, and Tyflotyuners.

4. Musiqa tiflopedagogikasi metodikasini ishlab chiqish va pedagoglarni bu tizim bo'yicha qayta tayyorlash.

Young people were fascinated by maturity and perfection in the muscular sphere. For this, the creation of a brail note alphabet in the country's step is very necessary. I think the product of the findings in this regard has been the foundation of young dragn people. In a nutshel, the philosophers who found their reflected in this article were turning their eyes to the theory of this regard in the future.
