Annotation

In the article, mature generation should not be consumers, but the creators and devotees of our modernized society, one of the main purpose of pedagogues and thoughts on conducting training on the process of personal development with students are described.

Keywords: happiness, positive qualities, the ideal man, the perfect person, sense of pride, the development of intellect, the readers, the new way of thinking, comfortable living in the new Uzbekistan.

Today's youth are not only the material, first of all, be free from the spiritual aspect, be separated from enemies to friends, along with human values to be concentrated at the national idea, in the form of partnership to their intellect, thought, the spiritual state of the regular form should go. Spiritual, moral values of a sign, while noble qualities, first of all in the family occurs. When it comes to speak about family, child-rearing, the role of parents in the family talk, genuine human qualities of the people of uzbekistan one of the "O'tkan kunlar" by Yusufbek Khodji the protagonist of the novel: "no one from this house was not going to be disgruntled" - great life philosophy is profound in that sentence the incarnation of specific people realize. Parents of children in front of the duties, of their own judgment prosperous executive (to put a good name, a good teacher donating to the release of literacy, educated, professional, make a craft, married, uyli - joyli like to) has debt.

RESULTS

They show the pattern they to do their duties with children, as well as harmoniously developed generation that can find a worthy place in society through will show. This condition at a glance it seems simple, but that have left an indelible mark in the life of the human family is great considering growing beneficially simple find operation in the hands of a humble man, president Islam Karimov's first "dream of harmoniously developed generation", "high spirituality-engilmas power" and "the mother of our country and the happiness and bliss is to serve the highest iqboli in the way of the future" in the game, as the family's role in society is incomparable to'xtalmaganliklariga we will make sure that no accident. Concern for future generations, educate the next generation to strive to produce the perfect nation is our national feature. Whether it is family or the neighborhood or the fullness is regarded as the pressing issues of youth or educational institution.

DISCUSS

Today, gracious, great, intention of ours is to gain our noble intentions, updated our society, our life progress and prospects, the effectiveness of our plan for ongoing events, the fate who meet the requirements of all time, highly qualified, specialist training, we need closely related to conscious of a problem with the obvious. After all, the way to the human heart, first of all, education starts from. To be put on the right path of education, training of competitive specialists in the world to be found proof of their experience has identified the country's prospects.

Awareness of people in today's era a quick-thinking thoughtful eyes looking at every person in the world who changes with the changes in demand. Especially, this process is the responsibility of the head is a huge responsibility.

In the same place, here the question arises: What are the qualities must have a leader today?

State policy efforts aimed at ensuring progress and prosperity in the wisdom of the event will be at the show and consistent accuracy. The head of state and the wisdom of the development of the country. The first president of uzbekistan, implementation of the national program for the training of the younger generation in the field of policy attention to exactly so in essence I was able to.

Most of those who rose to positions of leadership the great, the most holy task-education, the knowledge given out to the people, should consist of a career serving diligently to get high.

We east as well as parents, teachers we are people who value respect. The fathers from the beginning, our perfect use carefully and skillfully to master this method were used. They come from many years of experience in the way of the disciples identities, and educational tools - knowledge of school life were created through a spring enriched with the oriental thought.

Musa al Khwarizmi practical experience of this place to the world, Temporarily Ahmad, Abu rayhan Biruni, Abu Ali ibn Sina, Imam al-Bukhari, Al-Hakim at-Termizi, Najmiddin Kubro, Aziziddin Nafasiy, Abu Mansur Moturidiy, Ahmad Yassaviy, Bahouddin Nakshband, Alisher Navoi as thinkers-the ones it enlightenment, Amir Temur, Jaloliddin Manguberdi, Mirzo Ulugbek, Muhammad Babur like manly and brave-guardians of valor, it will deliver the unique mind.

“The ability to realize the attention of our children from childhood, giving them the fullness of all to mobilize if we have many more Beruniy, and Ibn Sina's were out of Ulugbek”, says President SH.Mirziyoyev.

We, the young generation of teachers to carry out the noble work of the main task used to train them since the return from evil and unacceptable work in this way, the works of the great thinkers of the tradition of national education, the people's wisdom, our grandfather, momolar use of our opportunities, obviously our work is efficient and effective. After all, the qur'an is “ Higher noticed in all of the children of the people” is called. Hadis in “ when someone takes knowledge of salvation he finds is called.

The idea of a perfect man, also a national human essence that is the idea. This idea not only of the individual but of the entire nation towards the development of high led them chapter was inspired spiritual and educational accomplishments are unmatched. The dream of perfection, to bring up the

generation care, healthy, harmonious educate the next generation if we are to strive to produce our national features, motivate you to master the science of ethics of this direction.

Every person is a universe as his ethics – ethics the universe is very complex. Because the appearance of the person and his inner side, the soul of the universe, especially the study of the mental state associated with this recall.

F. Attor “in the spirit of man, so should your travel inner side of yourself” the perfect man from the inner world of the nest should be for. “Simple spark can also reach the level of human perfection. The source of his knowledge,” says Imam G'azzoliyy.

So, we must start from ourselves, each of us reform our society to reform. Human change, society will change.

Deeply engaged approach to the understanding of self-conscious self – nurturing enhances the. Yourself - change is aimed at nurturing the business of the human person. Self – management on a conscious basis get to the heart of the body to be will help you to be healthy. “The goal from the human body – the highest achieve happiness; it primarily consists of what is know what is happiness, and that to him the idea himself and reach an agreement to take the highest order, the entire body should be fascinated with.

That leads to happiness, then this work consists of tools to apply and what you should know.

The final part: training and completes the overall conclusions said

Own goal to put the students in the training process, aspiration towards a dream, to be responsible, mistakes and shortcomings than the negative qualities to educate and learn. Provides guidance to students who strive to recognize and negative qualities to be rid of it. Beautiful qualities in training the students to be able to his walk-stand to get the guidance that useful, show initiative, to be resolute, for sure to have will help. This will cause the student to understand himself deeply engaged the conscious direction of approach.

Man does not know his own essence, under imbalance of the mind is, the more unhappy the mood arises. He then begin to seek ways for artificial lifting the mood.

Such malformations get much of the social, natural, human factoring is to reveal the essence of the original. Moral and ethical factors of human life is to help you understand the content. This in turn some psychological, mental diseases, prevents human life to a healthy, vibrant life that will inspire content.

Urgent issues of preservation and improvement of human qualities unique to human. Our children uzbekistan free and democratic worthy of the son - daughter, the issue of bringing up the main direction of our work in the field of spirituality should be established. The present stage in the development of our republic, historically engaged in the education of the young generation in the new institutions one of the functions of the first and most important teachers' all the students in addition to teaching regular grade their spiritual outlook to be at the level of the requirements of the period, there are opportunities to work should consist of.

The formation of a healthy generation is an important process to become a priority of state policy. Now our independent republic in the conditions of educational tools are so vital.

The basics of educational science than to read the content of education, which has in fact fan direction is difficult to read. Therefore, in this regard, specific methods, tools also is not fully formed.

Adopters also requires taking a new approach to the requirements of the XXI century reform of science. Please can you tell me with a sense of pride, we dissimilar scientists who made discoveries of our generation, we are their legitimate heirs. So, of the century will be the century humanistic everyone to ea qualities to be beautiful, should have opportunities to ro'yyobga out the essence of his life.

It's been keeping away towards spiritual revival and renewal of society.

Civil society in human dignity, intellect, and moral qualities are highly appreciated.

Indeed, our children are good, well-mannered, hard-working, healthy and extensive growth potential is in many ways dependent on their mother. Therefore, it is paid special attention to the choice of the future mother, in our religious guidelines. Aisha (roziyallohu anhu) has been reported from the messenger in the hadis, and bless sallallohu sallam: "Choose a suitable mother to your children "that is. Their children they are smart, wise, physically healthy, diyonatli, a religion, a society that benefits to the nation and to educate people must worry about. Typically, the father is often out of the house and feed the family in order to ensure, in all material respects, and there are mainly involved mothers raising children with home work. Therefore, the task of education, as children seem to be only a mother the rest. Bless the children of our father and our prophet Muhammad says which material from the supply so that the spiritual blessing stand those who said: "no one more beautiful than the father can't give gifts to their children behavior" (reported Termizi).

The nature of the child's parents, conduct, depending on the formation of the same family and that they would not be forgotten in the environment is necessary. Their function should be similar to the relation of the physician to the patient experienced the same. As it is known, nurturing parents in control children in the family he is righteous, are of an adult. The education of the children their age to be neglected in the time of to let you walk antichrist will lead to harmful consequences to the bad ones mixed in. Simply say, if the soul is similar to a white paper that you can write different writing children. You should write I can write as good as him. They enter whole heartedly into education to reach the good ones if it is necessary to use all opportunities to share. Obviously, parents, family, neighborhood, school plays an important role in the education of children.

Holy religion, the moral education of our youth-the education is considered one of the most important issues to pay attention to. Blessing and bless our prophet sallam sallallohu are: "Do your kids give education with the beautiful and decency".

Giving special importance to the education of our children, dressed them shaped honest, we used bite to eat, we saved them from the harmful effects of different flows, we protect our young from holl down to their parents, family, duty and responsibility always feel for the country in the year before that, we should educate them to think. Especially, parents must be attentive every moment, none must not be neglected in the education of youth.

In particular, in our country, create a healthy family environment, maternal and child health, the birth of healthy children, physical and spiritual done many good works in order to bring up the next generation. At the heart of all the noble aspirations of our children to grow healthy both physically and spiritually, their happiness-that happiness, and see the dream of a prosperous future lay.

Therefore, all of our youth all the dreams that came true, aspirations should be happy to live in the country who support a steady increase. Because our children the same care and attention as a result of everyone's admiration of those bearing the talented will be an adult. Currently, in our country in the field sports, art, music, science-technology increases the number of young people are becoming from day to day.

Dear all worldly moral high our children with knowledge, the basis of national traditions and our values are also searching should take. In people there is a saying: "easy to be a scientist, but be a difficult person". Therefore, comparisons of the achievements of science to go along with our children won humane, merciful effects and striving to perfect the work he was among the moral upbringing we should go.

Rearing perfect children represents the following:

Religious education – believer, honest and separate bad to good.

Moral – beautiful decency, humility, honesty, mercy, ethics and qualities.

Physical education in nutrition, sports teach, alcohol consumption, cigarette smoking is harmful habits such as back to.

Mental training – of-the-art professional useful to teach science and society.

Thus the youth of the future of independent Uzbekistan, confidence and pedigree will be.

Summary

The purpose of today's education system and the education system according to the organization, it is necessary to increase the effectiveness of educational activities.

The theoretical basis of the education system, from the east and national values should be had up top. After all of today's most pressing reform of the education sector in the future, our fate is decisive is becoming a problem.

Who won our rich spiritual heritage of our achievements today, tomorrow victory erishajak should be the basis of our living. The new thinking in our society should know the past to consider doing of course. So, thinkers and time requirements as well as the formation of the present our dream, perfect man the perfect person to have at a high level in the spiritual nurturing important and necessary step.

In this regard, the following educational principles are recommended

- Education in the process of familiarization with the activities of our great thinkers and readers life;
- Meaningful student projecting to spend your leisure time strengthening the cooperation between the family and the school;

- Education the recipient of the behavior of high-psychological qualities of nurturing behavior from me te korreksion transfer;
- To promote reader interaction to elevate the spiritual state of the young generation;
- Meaningful spiritual and moral education of pupils hours of transfer.
